Early Human Development, 27 (1991) 233–235
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

analysis, sucking behaviour, newborn infant, low-risk full-term infant, audio-visual aids, 163
audio-visual aids, sucking behaviour, newborn infant, low-risk full-term infant, analysis, 163
auditory development, brain-stem auditory evoked potentials, newborn infants, chronological, gestational age, 145

body temperature, ultradian rhythms, circadian rhythms, heart rate, premature babies, ontogeny, constant environment, 33
body water composition, extracellular fluid volume, bromide space, low birth weight infants, 19
brain-stem auditory evoked potentials, newborn infants, auditory development, chronological, gestational age, 145
bromide space, extracellular fluid volume, body water composition, low birth weight infants, 19
bromide space, premature infant, extracellular volume, colloids, 1

catecholamines, functional residual capacity, newborns, cesarean section, vaginal delivery, 103
cellular development, human thalamus, Golgi impregnation, morphometric analysis, 119
cesarean section, functional residual capacity, newborns, vaginal delivery, catecholamines, 103
chemoreceptors, infant, newborn, narcotics, cocaine, 175
chronological, brain-stem auditory evoked potentials, newborn infants, auditory development, gestational age, 145
circadian rhythms, ultradian rhythms, body temperature, heart rate, premature babies, ontogeny, constant environment, 33
cocaine, infant, newborn, narcotics, chemoreceptors, 175
colloids, premature infant, extracellular volume, bromide space, 1
constant environment, ultradian rhythms, circadian rhythms, body temperature, heart rate, premature babies, ontogeny, 33
cranial ultrasound, periventricular-intraventricular hemorrhage, reliability, very-low-birthweight, 9

development, growth retardation, visual evoked potential, 79

endothelin-1, serotonin, umbilical artery, umbilical vein, perfusion, 25
extracellular fluid volume, body water composition, bromide space, low birth weight infants, 19
extracellular volume, premature infant, bromide space, colloids, 1

fetal breathing movements, pulmonary hypoplasia, oligohydramnios, 53
fetal heart rate, spectral analysis, 1/f spectrum, 111
fetal heart rate variation, intrauterine growth retardation, fetal movements, fetal hypoxaemia, maternal hyperoxygenation, 223
fetal hypoxaemia, intrauterine growth retardation, fetal movements, fetal heart rate variation, maternal hyperoxygenation, 223
fetal movements, intrauterine growth retardation, fetal heart rate variation, fetal hypoxaemia, maternal hyperoxygenation, 223
functional residual capacity, newborns, cesarean section, vaginal delivery, catecholamines, 103

gestational age, brain-stem auditory evoked potentials, newborn infants, auditory development, chronological, 145
Golgi impregnation, human thalamus, cellular development, morphometric analysis, 119
growth retardation, visual evoked potential, development, 79
growth velocity, human fetus, ultrasound measurements, sexual difference, 93

heart rate, ultradian rhythms, circadian rhythms, body temperature, premature babies, ontogeny, constant environment, 33
heart rate variability, long term variability, short term variability, respiratory sinus arrhythmia, preterm infant, neonatal monitoring, 187

heart rate variability, respiratory distress syndrome, patent ductus arteriosus, periventricular haemorrhage, neonatal monitoring, preterm infant, 207
human fetus, growth velocity, ultrasound measurements, sexual difference, 93
human thalamus, cellular development, Golgi impregnation, morphometric analysis, 119

indomethacin, symptomatic patent ductus arteriosus, prematurity, volume expansion, intravenous fluids, 65
infant, newborn, narcotics, cocaine, chemoreceptors, 175
intrauterine growth retardation, fetal movements, fetal heart rate variation, fetal hypoxaemia, maternal hyperoxygenation, 223
intravenous fluids, symptomatic patent ductus arteriosus, prematurity, volume expansion, indomethacin, 65

long term variability, heart rate variability, short term variability, respiratory sinus arrhythmia, preterm infant, neonatal monitoring, 187
low-risk full-term infant, sucking behaviour, newborn infant, analysis, audio-visual aids, 163
low birth weight infants, extracellular fluid volume, body water composition, bromide space, 19

maternal hyperoxygenation, intrauterine growth retardation, fetal movements, fetal heart rate variation, fetal hypoxaemia, 223
morphometric analysis, human thalamus, cellular development, Golgi impregnation, 119

narcotics, infant, newborn, cocaine, chemoreceptors, 175
neonatal monitoring, heart rate variability, respiratory distress syndrome, patent ductus arteriosus, periventricular haemorrhage, preterm infant, 207
neonatal monitoring, heart rate variability, long term variability, short term variability, respiratory sinus arrhythmia, preterm infant, 187
newborn, infant, narcotics, cocaine, chemoreceptors, 175
newborns, functional residual capacity, cesarean section, vaginal delivery, catecholamines, 103
newborn infant, sucking behaviour, low-risk full-term infant, analysis, audio-visual aids, 163
newborn infants, brain-stem auditory evoked potentials, auditory development, chronological, gestational age, 145

oligohydramnios, pulmonary hypoplasia, fetal breathing movements, 53
ontogeny, ultradian rhythms, circadian rhythms, body temperature, heart rate, premature babies, constant environment, 33

patent ductus arteriosus, heart rate variability, respiratory distress syndrome, periventricular haemorrhage, neonatal monitoring, preterm infant, 207
perfusion, endothelin-1, serotonin, umbilical artery, umbilical vein, 25
periventricular-intraventricular hemorrhage, cranial ultrasound, reliability, very-low-birthweight, 9
periventricular haemorrhage, heart rate variability, respiratory distress syndrome, patent ductus arteriosus, neonatal monitoring, preterm infant, 207
premature babies, ultradian rhythms, circadian rhythms, body temperature, heart rate, ontogeny, constant environment, 33
premature infant, extracellular volume, bromide space, colloids, 1
prematurity, symptomatic patent ductus arteriosus, volume expansion, intravenous fluids, indomethacin, 65
preterm infant, heart rate variability, respiratory distress syndrome, patent ductus arteriosus, periventricular haemorrhage, neonatal monitoring, 207
preterm infant, heart rate variability, long term variability, short term variability, respiratory sinus arrhythmia, neonatal monitoring, 187
pulmonary hypoplasia, fetal breathing movements, oligohydramnios, 53

reliability, periventricular-intraventricular hemorrhage, cranial ultrasound, very-low-birthweight, 9
respiratory distress syndrome, heart rate variability, patent ductus arteriosus, periventricular haemorrhage, neonatal monitoring, preterm infant, 207
respiratory sinus arrhythmia, heart rate variability, long term variability, short term variability, preterm infant, neonatal monitoring, 187

serotonin, endothelin-1, umbilical artery, umbilical vein, perfusion, 25
sexual difference, human fetus, growth velocity, ultrasound measurements, 93
short term variability, heart rate variability, long term variability, respiratory sinus arrhythmia, preterm infant, neonatal monitoring, 187

spectral analysis, fetal heart rate, 1/f spectrum, 111
1/f spectrum, fetal heart rate, spectral analysis, 111
sucking behaviour, newborn infant, low-risk full-term infant, analysis, audio-visual aids, 163
symptomatic patent ductus arteriosus, prematurity, volume expansion, intravenous fluids, indomethacin, 65

ultradian rhythms, circadian rhythms, body temperature, heart rate, premature babies, ontogeny, constant environment, 33
ultrasound measurements, human fetus, growth velocity, sexual difference, 93
umbilical artery, endothelin-1, serotonin, umbilical vein, perfusion, 25
umbilical vein, endothelin-1, serotonin, umbilical artery, perfusion, 25

vaginal delivery, functional residual capacity, newborns, cesarean section, catecholamines, 103
very-low-birth-weight, periventricular-intraventricular hemorrhage, cranial ultrasound, reliability, 9
visual evoked potential, growth retardation, development, 79
volume expansion, symptomatic patent ductus arteriosus, prematurity, intravenous fluids, indomethacin, 65
